

## Symbiosis Notes!

- Symbiosis - any close, long-term <sup>biological</sup> interaction between 2 diff. organism

### 3 types of symbiosis:

1. Mutualism ("win-win")
2. Commensalism ("win-don't care")
3. Parasitism ("win-lose")

a. "Parasite & Host" vs. "Predator & Prey"

- Predators kill + eat immediately
- Parasites exploit host (don't necessarily kill + eat host)

**\*\*HOT TIP\*\*** When asked to classify a symbiotic relationship....

Base your answer on the info the question gives you.

Vocabulary	Definition	Example
Mutualism		
Commensalism		
Parasitism
