1. Take one piece of paper and fold it in half (hot dog style).
2. Cut the top third of the paper to create 5 flaps.
3. On the front of each flap, write a scientist's name: Hooke, Van Leeuwenhoek, Schleiden, Schwann, and Virchow
4. Also on the front of each flap, draw a symbol that represents the contribution of each scientist (for example, an animal for Schwann or a cell dividing for Virchow)
5. On the back of each flap, write how each man contributed to Cell Theory.
6. Under the flaps (in the large space):

- Summarize the 3 parts of the Cell theory
- Describe how a compound light microscope works and its role in the development of the Cell Theory
- Describe how an electron microscope works and how it has refined our understanding of cells

7. Put your name on the back of the foldable and turn it in.
*If you do not want to do a foldable, you may instead create a mini-poster, essay, or other product that includes all the same information

## Cell Theory Foldable* Homework

Due

1. Take one piece of paper and fold it in half (hot dog style).
2. Cut the top third of the paper to create 5 flaps.
3. On the front of each flap, write a scientist's name: Hooke, Van Leeuwenhoek, Schleiden, Schwann, and Virchow
4. Also on the front of each flap, draw a symbol that represents the contribution of each scientist (for example, an animal for Schwann or a cell dividing for Virchow)
5. On the back of each flap, write how each man contributed to Cell Theory.
6. Under the flaps (in the large space):

- Summarize the 3 parts of the Cell theory
- Describe how a compound light microscope works and its role in the development of the Cell Theory
- Describe how an electron microscope works and how it has refined our understanding of cells

7. Put your name on the back of the foldable and turn it in.
*If you do not want to do a foldable, you may instead create a mini-poster, essay, or other product that includes all the same information
