

Name _____ Block _____ Date _____

Characteristics of Viruses

The Research Question:

Describe essential characteristics of all living things.

Compare characteristics of the viruses to examples of living things from Table 10.1. Take notes.

Do you notice more similarities or more differences between viruses and known living things?

Conclusion (Use complete sentences.)

Claim – Answer the research question.

Evidence – Summarize important information (similarities and/or differences) from table 10.1.

Reasoning – Explain why your evidence “proves” your claim.
