

Organic Macromolecule Vocabulary

Directions:

- *Complete one Frayer Vocabulary Model for the each of the four organic macromolecules using your notes from class.*
- *Information must include, but is not limited to, the use every key word appropriately that is listed at the bottom of the next page.*

Definition in your own words (Including function)	Facts/characteristics (Including monomer)
Carbohydrate	
Examples	Structure / Picture

Definition in your own words (Including function)	Facts/characteristics (Including monomer)
Lipid	
Examples	Structure / Picture

Key words:

- | | | | |
|--------------------|-----------------|---------------------|--------------|
| Amino acid | DNA | Genetic information | Nucleotide |
| Cell communication | Energy storage | Glucose | Phospholipid |
| Cell membrane | Enzyme | Immediate energy | RNA |
| Cell structure | Fat, oil, & wax | Insulation | Starch |
| Cell transport | Fatty acid | Speed up metabolism | Structure |
| Cellulose | | Monosaccharide | Transport |
